1. VERBS

Doing words

Latin examples: amo=I love, audio=I hear

Some verb terms:

Tenses

Tell us when the verb happened. The Scholarship verb tenses are:

Present=I am doing/I do

Future=I will do

Imperfect=I was doing/I used to do

Perfect=I have done/I did

Pluperfect=I had done

Persons

Verbs have persons e.g.

<u>Person</u>	<u>Singular</u>	<u>Plural</u>
1 st	I	We
2 nd	You (singular)	You (plural)
3 rd	He, she, it	They

e.g. amaNT (they love) would be 3rd person plural, present tense

Number

This means whether the verb is singular or plural

1st person singular, present tense

If you are asked to give the 1st person singular present tense of a verb this means that you must give the most basic form of the verb-the one which ends in O.

e.g. amO, regO etc

The Imperative Mood (Commands)

e.g. Be quiet! Sit down! The Latin endings are:

<u>singular</u>	<u>plural</u>	<u>meaning</u>
spectA	spectATE	look!
sedE	sedETE	sit down!
regE	regITE	rule!
audI	audITE	listen!

Note that the perfect and pluperfect of eo can also be formed with a V instead e.g.

iVI, iVISTI, iVIT etc

The Passive Voice

This is a type of verb which is used to describe a situation in a slightly different way e.g.

active verb

The girl read the book

passive verb

The book was read by the girl

If the word "by" is in the sentence this is a good indication of whether a verb is active or passive.

Notice that ordinary verbs are called active verbs and are said to be in the "active voice."

TENSE	MEANING
PRESENT	
amOR	<i>I am loved</i>
amaRIS	<i>You (sing.) are loved</i>
amaTUR	<i>He/She/It is loved</i>

ama BATUR	<i>He/She/It was loved</i>
ama BAMUR	<i>We were loved</i>
ama BAMINI	<i>You (plural) were loved</i>
ama BANTUR	<i>They were loved</i>

NB The three tenses below are formed from the perfect participle passive (AMATUS) plus the correct part of the verb SUM. See participle section below for further information of perfect participles.

The participle must agree with its noun in number, gender and case e.g.

The girl has been loved=puella amata est

The girls had been loved=puellae amatae erant.

Deponent verbs

These are verbs which look like passive verbs but translated as ordinary (active) verbs:
Some common deponent verbs:

conor, conari, conatus sum, try
egredior, egredi, egressus sum, go out
hortor, hortari, hortatus sum, encourage
ingredior, ingredi, ingressus sum, go in, enter
labor, labi, lapsus sum, slip, fall
loquor, loqui, locutus sum, speak
minor, minari, minatus sum, I threaten
miror, mirari, miratus sum, I admire
mori, mori, mortuus sum, die
moror, morari, moratus sum, delay
orior, oriri, ortus sum, arise
patior, pati, passus sum, suffer
proficiscor, proficisci, profectus sum, set out
progredior, progredi, progressus sum, advance
regredior, regredi, regressus sum, go back
sequor, sequi, secutus sum, follow
vereor, vereri, veritus sum, fear
videor, videri, visus sum, seem

Semi-deponent verbs

With semi-deponent verbs only the perfect, pluperfect and future perfect tenses look like passives. Just as with deponent verbs, they are always translated as ordinary verbs:

audeo, audere, ausus sum, dare
confido, confidere, confisus sum, trust in + the dative
fio, fieri, factus sum, become, am made
gaudeo, gaudere, gavisus sum, rejoice
soleo, solere, solitus sum, be accustomed to

Participles

These are a cross between a verb and an adjective. They are formed from verbs but must agree with a noun in number, gender and case just like an adjective.

There are 3 types of participle: present, future, perfect passive

Latin Grammar Booklet Scholarship

Name:.....

<i>Tense</i>	<i>PRESENT</i>	<i>PRESENT</i>
<i>Gender:</i>	<i>MASC/FEM</i>	<i>NEUTER</i>
SINGULAR		
nominative	amans	amans
vocative	amans	amans
accusative	amant EM	amans
genitive	amant IS	amant IS
dative	amant I	amant I

accusative	amant ES	amant IA
genitive	amant IUM	amant IUM
dative	amant IBUS	amant IBUS
ablative	amant IBUS	amant IBUS

Other conjugations

2nd=monens, monentis; 3rd=regens, regentis 4th=audiens, audientis

In English present participles are always translated with “ing” on the end.

e.g. puellam clamantem magna voce audivi=I heard the girl shouting in a loud voice

Perfect participles-usually passive (also known as the PPP-perfect participle passive)

These are formed from the 4th principal part of a verb e.g. amo, amare, amavi, amatum

Note that the 4th principal part might sometimes be irregular e.g. fero, ferre, tuli, latum=I carry

amatUS-A-UM= having been loved

monitUS-A-UM=having been warned

rectUS-A-UM=having been ruled

auditus-A-UM=having been heard

latUS-A-UM=having been carried

These participles decline like DOMINUS, PUELLA, BELLUM

e.g visus a matre, puer domum redire constituit=Having been seen by his mother the boy decided to return home.

dominus iam monitum servum necavit=the master killed the already warned slave (or perhaps better English: the master killed the slave who had already been warned)

NB: perfect participles of deponent verbs are not translated as passives but actives (because they are passive in form but active in meaning)

Latin Grammar Booklet Scholarship

Name:.....

e.g. conatus=having tried
lapsus=having slipped

Future participles

These are also formed from the 4th principal part of a verb (see perfect participles above)
amatURUS-A-UM=about to love

auditURUS-A-UM=about to hear (declines like DOMINUS, PUELLA, BELLUM)

dux vulneraturum militem necavit=the leader killed the about to wound soldier
or in much better English: the leader killed the soldier who was about to wound him.

The Ablative Absolute

The Ablative Absolute is made up of a noun and a participle, both in the Ablative case. They are often found at the beginning of a sentence, separated from the rest of the sentence with a comma e.g.

nave deligata, cives domum redierunt

would be translated literally as: **The ship having been tied up**, the citizens returned home.

This translation would not impress an examiner! You should think about what makes sense and sounds best in the context of the sentence e.g.

After the ship had been tied up....

When the ship had been tied up.....

The ship was tied up and.....

- If a *present* participle is used, the clause begins with the word *while*...

e.g. **magistro loquente**, pueri tacebant.

While the teacher was speaking the boys were quiet.

The Subjunctive Mood

The tenses you have learnt so far have all been in the Indicative Mood. The Indicative is used to express facts. The Subjunctive mood usually deals with matters which are not expressed as definite facts. In Latin the Subjunctive is used to express purpose, wish, possibility and fear.

It actually means very little on its own (but see point 6 below). It is usually used as part of other grammar constructions where it is just translated like a normal verb.

The imperfect subjunctive

This is formed by adding the endings (shown in bold capitals) to the present infinitive:

Latin Grammar Booklet Scholarship

Name:.....

	<i>1st conjugation</i>		<i>irregular</i>

<i>You (plural)</i>	amavisse TIS	<i>You (plural)</i>	fuisse TIS
<i>They</i>	amavisse NT	<i>They</i>	fuisse NT

The subjunctive mood is very important in Latin. It has 6 main uses in sentences.

1. Cum Clauses

If the word "cum" is used in a clause with a verb in the subjunctive, it is translated as "when" or "since." The verb is translated as if it was in the Indicative Mood.

Cum ad templum ambulavissem...

When I had walked to the temple...

2. Purpose Clauses

To show that something is happening in order to do something else, a purpose clause is used. The word "ut" must appear in the sentence between the action and the purpose. There are normally two verbs in sentences with purpose clauses - one in the indicative to show the action and a verb in the subjunctive to show the purpose.

The "ut" is translated as "to" or "in order to" and the following subjunctive verb is translated as an infinitive in the indicative mood.

ad tabernam ambulavimus **ut** ancillam **videremus**

We walked to the shop **in order to see** the slave-girl.

Sometimes "qui" (who) is used instead of "ut", but the sentence should be translated in the same way.

3. Result Clauses

Result clauses show what happens as a result of something happening. They are formed by a "result word", the word "ut" and a subjunctive verb.

The word "ut" is translated as "that" and the subjunctive verb is translated in the indicative mood.

Latin Grammar Booklet Scholarship

Name:.....

tantas divitias adeptus est **ut** villam splendidam iam **possideat**

He has obtained **such great** riches **that** he now **owns** a splendid villa.

Result Words

- talis - such
- tam - so
- tantas - such great, so great
- tot - so many

4. Indirect Question

An indirect question is where the question is stated but not directly asked. They are formed by a verb of asking, a "question word" and a verb in the subjunctive. The verb in the subjunctive is translated as if it was in the indicative mood. There is no "**ut**" in an indirect question.

miles iuvenem **rogavit quid** prope horreum **faceret** =The soldier **asked** the young man **what** he **was doing** near the granary.

Question Words

- cur - why
- quare - why
- quid - what
- quis - who
- quo - where to
- quo modo - how (in what way)
- quot - how many
- ubi - where/when

5. Indirect Command

An indirect command is where an order is stated but not directly asked. They are formed by a verb of ordering, the word "ut" and a verb in the subjunctive. The "ut" is translated as "to" and the following subjunctive verb is translated as an infinitive in the indicative mood.

centurio militibus **imperavit ut** hostes **invenirent**

The centurion **ordered** the soldiers **to find** the enemy.

Common ordering words

- impero, imperare, imperavi, imperatum - to command
- iubeo, iubere, iussi, iussum - to order
- persuadeo, persuadere, persuasi, persuasum - to persuade
- oro, orare, oravi, oratum - to beg

6. Alone

The subjunctive is occasionally found on its own in a sentence. This is translated as a possibility (i.e. something may/might happen)

Latin Grammar Booklet Scholarship

Name:.....

It may also be a jussive subjunctive- "let him..." eg amet = let him love

This is like an order. Another good example is "exeat=let him/her go out"

(The word "jussive" comes from the Latin word iubeo, iussi -I order).

The Negative Subjunctive

To change a sentence containing "ut" into a negative sentence, one must replace the word "ut" with the word "ne". The sentence should still be translated in the same way, except the verb in the subjunctive should be negative.

centurio militibus imperavit **ne** hostes invenirent =The centurion ordered the soldiers **not** to find the enemy.

Indirect Statement (also known as "accusative and infinitive" or "reported speech")

Please note that this is an indirect construction where the subjunctive is **NOT** used:

An indirect statement is where a statement is reported to someone else or written down. All indirect statements contain an introductory verb, a noun in the accusative case and a verb in the infinitive.

e.g. direct statement: "the merchant is approaching the city:" "mercator ad urbem appropinquat."

audio mercatorem ad urbem **appropinquare**=I hear *that* the merchant is approaching the city.

When translated into English, all indirect statements must contain the word "that".

Common verbs which introduce an indirect statement:

audio, audire, audivi, auditum - to hear

credo, credere, credidi, creditum - to believe

dico, dicere, dixi, dictum - to say

nescio, nescire, nescivi, nescitum – to not know

puto, putare, putavi, putatum - to think

scio, scire, scivi, scitum - to know

Verbs: Principal Parts

When a typical Latin verb is presented in a vocabulary list you will almost always see FOUR forms of that verb. These forms are called the principal parts of the verb. Knowing them helps you to recognise, understand and produce all other forms of the verb.

It is very important to learn these carefully as some can be highly irregular (see FERRO below):

REGULAR PRINCIPAL PARTS

First Principal Part	Second Principal Part	Third Principal Part	Fourth Principal Part
AMO	AMARE	AMAUI	AMATUM
The present indicative active 1 st person singular=	The present infinitive active=	The perfect indicative active 1 st person singular=	The perfect participle passive (PPP)=

2. NOUNS

Names of something e.g. book, tree, desk

In Latin nouns have different endings.

These tell you the noun's job in a sentence.

The noun's job is called the case

<u>Case Name</u>	<u>Meaning</u>
Nominative	subject of sentence
Vocative	When talking to someone
Accusative	object of sentence
Genitive	of
Dative	to or for
Ablative	by, with or from

Other noun terms

Gender

masculine, feminine or neuter

Number

Whether the noun is singular or plural

Subjects and objects

If you are asked for the subject of a verb you must look for who is doing the verb action e.g.

 verb
Marcus puerum videt

 verb
Marcus sees the boy

The subject would be Marcus.

If you are asked for the object of a sentence you must find who is having the verb action done to them, so in the sentence above the object would be "puerum" (boy).

A much easier way to spot subjects and objects is to learn the noun table below and the case meanings (above).

TOP TIP: If you are asked for the case of the word "puellae" in the sentence below it will be vocative (when talking to someone).

"salvete, puellae!" "Hello, girls!". The speech marks are the main clue.

3. PRONOUNS

A pronoun is a word which can replace a noun in a sentence. Examples are:
I, you, we, this, that

Personal Pronouns

These are not essential in Latin because the verb person is contained in the verb itself e.g. amo=I love.
When they are used with a verb it is often for extra emphasis or to point out a contrast
e.g. ego clamo sed tu taces=I shout but you are quiet.
NB there is no vocative in I and we

	<i>I</i>	<i>You (singular)</i>
SINGULAR		
nominative	ego	tu

4. ADJECTIVES

These describe nouns e.g. big, small

Latin examples and possible endings:

1st and 2nd declension adjectives

bonus=good (masculine ending)

parva=small (feminine ending)

magnum=big (neuter ending)

3rd declension adjectives

tristis=sad (masculine and feminine ending)

forte=brave (neuter ending)

See noun tables for a reminder of how 3rd declension adjectives decline

NB: There are no 4th and 5th declension adjectives in Latin

Comparative Adjectives

These are used when you are comparing nouns e.g.

This road is longer than that one

longer is a comparative adjective.

in Latin they are formed by adding -IOR to the stem e.g. longIOR=longer

Look out for plurals: longIORES and neuter nouns: longIUS

Latin Grammar Booklet Scholarship

Name:.....

Superlative Adjectives

These are used when you want to say “very long” or “longest”

In Latin they are formed by adding ISSIMUS to the stem e.g. longISSIMUS=very long/longest

If an adjective ends in ER (e.g. pulchER=beautiful) ERRIMUS is added instead e.g. pulchERRIMUS=very beautiful

IRREGULAR COMPARISON OF ADJECTIVES

In Latin (as in English) some adjectives are irregular when they are used in comparisons:

positive	comparative	superlative
bonus (good)	melior (better)	optimus (best; very good)
malus (bad)	peior (worse)	pessimus (worst; very bad)
magnus (big)	maior (bigger)	maximus (biggest; very big)
parvus (small)	minor (smaller)	minimus (smallest; very small)
multus (much)	plus (more)	plurimus (most; very much)
multi (many)	plures (more)	plurimi (most; very many)

5. ADVERBS

These describe verbs e.g. slowly, quickly

Possible Latin endings:

-E e.g. lentE=slowly
-TER e.g. celeriTER=quickly

5. ADVERBS CONTINUED

Also look out for:

Adverbs of Time

e.g. subito=suddenly
deinde=then
diu=for a long time

TOP TIP: If you have been asked to find an adverb and you get really stuck you could always look for NON (not) which is also an adverb. It will be found in front of a verb e.g. NON curro=I do not run

6. PREPOSITIONS

Tell us where something is (the positions of things) e.g.: in, on, under

In Latin prepositions always stand in front of a noun.

The noun following it always has an accusative or ablative ending.

You may be asked to find the following in a Latin passage:

1. a preposition followed by a noun in the accusative case
2. a preposition followed by a noun in the ablative case

To answer this question you must learn the following list carefully:

<u>Prepositions followed by accusative nouns</u>	<u>Meaning</u>	<u>Prepositions followed by ablative nouns</u>	<u>Meaning</u>
ad	to, towards	a/ab	from, by
contra	against	cum	with
in *	into	de	down from, about
per	through, along	e/ex	out of
prope	near	in *	in
trans	across	pro	on behalf of, in front of
ante	before	sine	without
circum	around	sub	under
inter	between, among		
post	after		
propter	because of		
super	above		

* Be careful with "in"

With the accusative it means "into" e.g. I go into the classroom

With the ablative it means "in" e.g. I stand in the classroom

7. EXPRESSIONS OF TIME

accusative

The accusative is used to express how long something happened for e.g.
rex multos annos regebat=The king ruled for many years

ablative

i. The ablative is used to express the time when or at which something happened e.g.

tertia hora domum reliquimus=At the third hour we left the house

ii. The ablative is also used to express time within which something happened e.g.

quinque diebus ad urbem redibimus=Within five days (in five days time) we will return to the city.

8. **NUMBERS**

There are two types:

Cardinal numbers are ordinary numbers e.g. one, two, three etc

e.g. Latin: unus, duo, tres

Ordinal numbers tell us the order of something e.g. first, second, third etc

e.g. Latin: primus, secundus, tertius

9. **CONJUNCTIONS**

These are connecting words which join parts of a sentence together. Some English and Latin examples are given below:

et=and

enim/nam=for

itaque=and so

quamquam=although

quod=because

sed=but

si =if
